1.Mention 1 or 2 Functional requirements and 1 or 2 non-functional requirements of the Student Registration System

Functional:

- Login to student registration system.
- Users should browse and search for courses that they want to register in.

Non-Functional:

- The system should react to users adding courses to their schedule within 5 seconds.

2.Write two functional requirements and two non-functional requirements of online store. Discuss the requirements with other students and exchange comments, then ask the engineer to review them.

Functional:

- Users should be able to view the items that are available in the store,
- Users should be able to add items to their cart.

Non-Functional:

- Online store system should ensure secure transactions when a user pays,
- The system should be able to work even when there 100+ users in the website.
